## Customer Reviews

This book was just what we needed. We picked one of the designs and took it to a local architect, who adapted it to our requirements. The house is up now and we're planning to move in soon, and it is drop-dead GORGEOUS! So for us this book was a wonderful investment. Of course it has many many designs we didn't like one bit, and it's low on art theory etc. But it's very practical and we consider ourselves lucky we found it.

I use the book as reference material to work on my house, it gives a little help for me only.

Title should be "Mediterranean Lack of Inspiration". This book will appeal to those with too much money, too few brains and absolutely no taste. Although America, rightly so, lays claim to some of the finest examples of Mediterranean Revival in the world, this book does nothing to bring the reader into the understated elegance created by those homes. Instead it continues the trite and tasteless habit of ostentatious behavior we Yanks have become known for the world over. The designs are thinly veiled examples of the MacMansions found on converted corn fields, complete with corn-fed

owners, throughout America. Bigger is better and gaudy is better still. The book should not be used for reference material or even a coffee table book unless you need something on which you may rest your Bud while watching Monster Truck episodes. Using this book for reference will not supply any insight into the Mediterranean style, but it will demonstrate just how good we are at commandeering a style that has been perfected over hundreds of years and "fixing" or "improving" it. If you are interested in the Mediterranean style in America, try "Red Tile Style" by Aroll Gellner or "Santa Barbara Style" by Kathryn Masson. There are also many books covering the work of Addison Mizner and George Washington Smith in Florida and giants such as Julia Morgan in the West. This book MIGHT be good to line the cat's litter box, but be forewarned, the cat may object.

I've traveled throughout the Mediterranean coast - Spain, France, Italy. I am rebuilding my USA house and I was looking for some design ideas like those cute stucco exteriors and little windows. This is not the book for me. This is a collection of plans for million-dollar McMansions full of useless columns and arches. If you have enough money for this type of excess, then pay the architect and skip the book.

This book has some beautiful pictures and I enjoy looking thru it periodically to get new ideas. Makes a great coffee table book.

This book has beautiful photos and sketched home plans for luxurious living. If you are looking for ideas to build an estate or a waterfront home, this is a good choice. It has home plans from designers like Sater.
