Customer Reviews

“The real mainstay of this book comes in educating those inexperienced in bandage application and I believe it to be indispensable to those studying towards a veterinary nursing or veterinary undergraduate degree.” (VN Times Veterinary Nursing Times, 1 October 2012) “This book is a must have for veterinary nurses and technicians.” (Tomorrow’s Vets, 1 January 2012) “The chapter on extremity bandaging is excellent . . . Also illustrated are body, hip, shoulder, abdomen, and head bandages. All of them clever and innovative by their design.” (Vin Book Reviews, 2011) “This is a concise and complete bandaging reference for small animal practitioners. The figures and descriptions provide clear and easy to understand instructions on bandaging, casting, and splinting the small animal patient. In addition to clear written descriptions,

the book contains excellent quality step-by-step photographic depictions of bandage placement. When compared to surgery books such as the Textbook of Small Animal Surgery, 3rd edition Slatter (Elsevier, 2003), or Small Animal Surgery, 3rd edition, Fossum et al. (Elsevier, 2007), this one provides better stepwise instruction on use of both simple and more complex bandages. The quality of its photographic instructions is far superior to that of these other books." (Doody's Reviews, May 2011)

Very good guide to common and some less common bandages. Pictures high quality and instructions clear. The copy I ordered was in good condition but got a little curled from being stuck in a tiny mailbox, not the fault of the seller.

I really like the illustrations in this book but I'd really like it better if it went more in depth about how to keep bandages on.

Excellent reference for reviewing common bandages but also invaluable for reviewing bandages that you don't have to place very often.

Descriptions are very clear, photos are helpful. I bought it to remember how to apply an Ehmer sling, and it had exactly the instructions I needed.

Good resource for bandaging techniques and some new ideas for our clinic and clients. I got it for

my technicians.
