Big Book Of HOW (A TIME For Kids Book) (Time For Kids Magazine)

Synopsis

TIME For Kids The Big Book of How presents kids 8-12 years old with answers to the kinds of intriguing questions that appeal to their sense of curiosity. Colorful graphics, spectacular photos and clear, engaging diagrams will help answer such questions as: How does a chameleon change colors?; How can a person survive in the jungle?; How do you build a teepee?; How do diamonds form?; How do light sticks work?; How are 3-D movies made?; How do astronauts train for a space mission?; How do we get cavities?; How does solar energy work? Divided by subject area-from animals, the human body and technology to sports, food and green issues-kids will discover the background behind the questions through the book's photos, diagrams and art as well as its clear text. Of course, TIME For Kids goes beyond just answering the question, and engages kids with hands-on activities at the end of each chapter that bring life to a topic or idea they just read about. For example: If in the technology chapter kids learn how an airplane flies, the "How to" spread might include step-by-step instructions about how to fold a paper airplane or create a rotating helicopter. TIME For Kids The Big Book of How is a must-have book to satisfy the most curious of kids.

Book Information

Lexile Measure: 890 (What's this?)

Series: Time for Kids Magazine

Hardcover: 192 pages

Publisher: Time For Kids (June 7, 2011)

Language: English

ISBN-10: 160320184X

ISBN-13: 978-1603201841

Product Dimensions: 8.2 x 0.8 x 9.8 inches

Shipping Weight: 1.4 pounds (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars 127 customer reviews

Age Range: 9 - 12 years

Grade Level: 3 - 7

Customer Reviews

My eight year old likes this because it has very cool and awesome facts about the human body,

especially because he really wants to start studying the human body and see how gross and cool it is. It has fun food facts in it. It also has science things and science is a very amazing subject. And the science chapter is awesome. On the down side, in his own opinion, because it has some boring subjects like going green because you can easily learn about that by yourself by growing things. But otherwise, it is a nice book to read if you're looking to expand your brain!!!

I'm always reading reviews but never leaving any but this book was a hit with my family from the moment I opened the package so I had to come and write a review. It's broken up into chapters (animals, transportation, ect..) so you know what you will be learning about in that chapter instead of all mixed together like some books we have purchased. I have two boys (7 and 8) and a daughter that is 13. They have started the crystal project and my son took the book to school today to show his class how elephants communicate. We as a family will sit in the livingroom while my daughter holds the book someone will pick a number that will be the chapter we review and then someone else will pick another number and that will be the subject we read about that night. LOTS of GREAT information in the book and keeps kids attention! Can't say enough about how great this book is. 100% worth the money

Before passing this book on to my grand nephew, I read it and was amazed at "How" little I knew about the "how" of things. I found that I enjoy the Science channel's "How It's Made" series. Although this it written at a diferent level of understanding, I found it to be a refreshing way to be in the "know." My neice said that my grand nephew is always asking her and her husband questions...and in effect enlightening them, too.

I purchased this book as a Christmas gift for my nephew who loves to tell me facts about trains. I was hoping to expand his interests. My nephew is 12 and I was worried a book would not be the most fun gift, but the moment he opened it up, he started reading it and seemed to enjoy the information he was learning. His mom also thanked me for not getting him another train gift. :)

Kids loved it.

Gift. No problems noted.

I bought my 10 year old grandson "Big Book of How" and the "Just

Joking" as part of his birthday gifts. His mother wrote the following to me. "The books came yesterday & he LOVED them! He couldn't put either one down & Read out loud every other page, 'Hey Mom! Did you know _____ !" This is from a child who can read, but has never really enjoyed it. Enough said.

I've been looking at these for some time I always trying to get him to read more. I finally bought two for my grandson man he was thrilled with them! He skyped me to tell me how much he liked them, yay TIME MAG!! I'll will be getting the rest for him a better reader is a better learner.
