The Startup Owner's Manual: The Step-By-Step Guide For Building A Great Company

Synopsis

More than 100,000 entrepreneurs rely on this book for detailed, step-by-step instructions on building successful, scalable, profitable startups. The National Science Foundation pays hundreds of startup teams each year to follow the process outlined in the book, and it's taught at Stanford, Berkeley, Columbia and more than 100 other leading universities worldwide. Why? The Startup Owner's Manual guides you, step-by-step, as you put the Customer Development process to work. This method was created by renowned Silicon Valley startup expert Steve Blank, acknowledged catalyst of the "Lean Startup" movement, and tested and refined by him for more than a decade. This 608-page how-to guide includes over 100 charts, graphs, and diagrams, plus 77 valuable checklists that guide you as you drive your company toward profitability. It will help you:

- Avoid the 9 deadly sins that destroy startups' chances for success
- Use the Customer Development method to bring your business idea to life
- Incorporate the Business Model Canvas as the organizing principle for startup hypotheses
- Identify your customers and determine how to "get, keep and grow" customers profitably
- Compute how you'll drive your startup to repeatable, scalable profits.

The kindle version of this is NOT the same as The Startup Owner's Manual! Instead you get the Startup Owner's Strategy Guide, which is a very condensed version. I bought this for a class and was super frustrated to find that it wasn't the same as the original hardcover book. I am going to try to get a refund because it's not what was advertised to me. Ugh.

Great book, I recommend to anyone looking to start up a business. I read this prior to starting up my LLC and it answered most of my questions, but not all.

Essential for everyone that starts a business. Really gets down to the issues an entrepreneur. Also and excellent reference book.

I was given this book by the author at SXSW about 3 years ago and have used it as a resource throughout the past years. It's great to dip into chapters and get ideas to move forwards. I love that the book is written by REAL entrepreneur that have actually build companies. So many books are written by people that simply know the theory...but this book is the real deal! Five Stars!

An absolutely essential read for entrepreneurs and founders. This is a manual that takes you through a process of building your business model (most critical component for the startup) in a step-by-step manner. The design/layout can be greatly improved, but the core topic of the book is fantastic. Changed the game for startups.

When I first get in touch with the idea of "startup" I really had no idea how to start or what to do in order to get myself started in the right direction. After I had read this book, i have learned there is a systematic way of starting your own startup. That doesn't mean you will be able to build a multi billion \$ business but if you enjoy being an entrepreneur and you have the passion to change the world and you are not satisfied with the current situation on something. This is a must read for you to get started

This book is different from the general trend. It is the one which will instruct you step by step and will

teach you why Start-Up are not comparable with running businesses. To be successful while running a Start_up, a new "science" had to replace the old MBA programs. I found support for many personal understandings which were not in line with recommendations of successful entrepreneurs who belong to different time slots. As the market and investment possibilities change in just a few years, a real theory, like the one described in this book, is required to be prepared to react on current challenges with updated strategies instead of using old and no more relevant tactics.

Great book, it gives you all the steps you need to start your own start up, only thing is that sometimes it repeats itself to much.
