Michael V. Brown is founder and President of New Standard Institute, a management consulting and training service that counts Shell, Merck, Coors, Kraft, and Southern Company among its clients. He has designed and implemented storeroom management, computerization, and modernization programs for numerous organizations.

When I was told that I had to oversee the re-organization of our large spares storeroom, I immediately started looking for help on line because my experience in the matter was quite outdated. This book helped me to understand the various requirements of an efficient storeroom and helped me reconcile the company's needs and what the vendors of software and storage products were offering us. In the end, we reached a solution that was efficient and scalable. Thanks to this book, I was able to ace the task and save the company some serious money.

I have studied on this subject from ESSO Refinery while I was the warehouse superintendence , they call MRO management , and at the time being I am a instructor training for public and in house courses. after I have read this book Mr Michael V. Brown, he wrote a very useful chapters give me most understand 360 around the MRO itemsSuchart Supamongkol
