Theoretical Foundations And Discussions On The Reformation Process In Local Governments (Advances In Public Policy And Administration)

Synopsis

Local government can be defined as a public entity acting as the sub-unit of a state or of a region, charged with the task of enforcing public policies. There have been many reforms of local government in recent years from the grassroots-led movement that took root in the 90s to the overarching effects of globalization and decentralization. Local governments must adapt their practices in order to most effectively provide for their constituents. *Theoretical Foundations and Discussions on the Reformation Process in Local Government* addresses the effects of recent reforms in the political-administrative system of local governments and politics as well as future outlooks. It reviews the challenges, innovations, and lessons from local governments while providing theoretical perspectives on methods for positive reform. This book is a critical reference source for policy makers, government organizations, professionals, and actors in both local and international politics.
