Customer Reviews

Aimed primarily at students who will be working in the field, this book offers a thorough, practical overview of the way our current system of probation and parole deals with convicted adults and juvenile offenders. This new edition is the only major text to combine the standard topics in probation and parole with full coverage of recent trends in community corrections, including such options as electronic monitoring, home incarceration, community day reporting centers, and victim

compensation programs. Besides describing the range of current programs, the text discusses various classes of offenders, with a special section on the problems posed by juveniles. It also examines such professional topics as training and officer effectiveness, as well as the larger issues of economic and political influences on the system. The book is exceptionally well organized and emphasizes a legalistic approach, noting key legal cases where appropriate and including U.S. Supreme Court decisions up to 1994. --This text refers to an out of print or unavailable edition of this title.

Pretty good book for all the basic knowledge you'll need for a Community Corrections class. Key terminology is explained in such a way that anyone without any familiarity of the topic can pick it up and understand.

Fast shipping, good price, satisfied with purchase

I received my book today, I am extremely happy with my order, my book looks brand new. Thank you!!!

I am completely satisfied with this book. I am taking online classes and even though the book is supposed to be online, I do better with a physical book. Thank you.

This textbook, if required, would be the only way I would recommend purchasing it. Otherwise, this textbook is not suggested to be used in a university setting. Why I say this: There is information that is repeated, multiple times, often within the same paragraph. The author does so by rephrasing something, or reusing a phrase word-for-word. This is noticeable within each section, and even runs throughout chapters, and through the whole book. Therefore, not only is something repeated for the length of a chapter, it could be seen once again in a new chapter. I understand that a textbook is often used in an order other than how it is written, and therefore base knowledge is necessary to expand, yet sometimes it is overdone, and often incorrectly. Additionally, it could be stated that it is repeated to pound the information in, yet I do not see this as being true. The information is often simple: they want to rehabilitate the offender.... and a few lines later... the offender must be rehabilitated... this program therefore aims at rehabilitation. The chapters are unnecessarily long due to this fact, and additional "fluff" information that is often irrelevant and often misplaced. Although it is difficult to express the issue I have with this book, as well as the issues expressed by many of my peers, I can summarize and say this book is inadequate at creating a flow of cohesive and necessary information. It is not conducive to teaching a topic, and merely presents facts (and often blatant opinion, sexism, and lack of sensitivity) in a jumbled manner with lack of regards to placing it within understandably formed sections. This was a poor book.

This book came in great shape and I love the fact I don't have to spend hundreds of dollars for a couple of weeks.

I was quite surprised to see a hardcopy book, but inside was a wealth of information that will certainly enrich me in my class and future endeavors.

came in perfect condition
