Customer Reviews

"This is a comprehensive and detailed self-assessment book that is a strong addition to the library of physicians testing their knowledge of the cardiovascular sciences." Reviewed by Alban De Schutter, MD, MSc (Ochsner Clinic Foundation) Doody's Score: 92 - 4 Stars! "The book is particularly useful to cardiology fellows. I think studying a topic by questions is a fun and easy way to learn a great deal. Highly recommended." -The American Journal of Cardiology (2016;118:149e152)

I used this book to prepare for ABIM maintenance of certification examinations. Overall this book is

superb. The narrative explanation of answers to questions alone provided me an outstanding refresher in cardiovascular disease. Unlike other test-prep books I've used in the past, the questions and answers were generally very useful and neither esoteric or anxiety-provoking. This was far better than the corresponding ACCSAP I reviewed as well.

I'm a 3rd year cardiology fellow and bought this to help me prepare for CV boards. Questions are worded well and are relevant to board's topics. Will use it continuously thought this year as a study tool.

This is a good book with good, board-style questions and well written answers/explanations. What's even better than the book is the code that you get with the book that allows you online access to the same material.

It's braunwald which is the foundation of cardiology... The questions are great with mostly good explanations
