Customer Reviews

Cute, cuddly koalas are often mistaken for bears, but this book dispels that and many other myths. Koalas' ecosystem, life cycle, feeding habits, and social behaviors are all discussed in straightforward detail. The publisher categorizes this series by readability, and this book, a level one, is written for kids who are just learning to read on their own. The text, therefore, is concise and contains plenty of sight words. Silly riddles and interesting trivia dot the pages, and the maps included live up to the standards set by other National Geographic Kids books. Full-color photographs are not only engaging and attractive but also serve to provide context for emergent

readers. A picture glossary is included in the back matter. As an added incentive for reading, this edition is one of the many books on the publisher's website that include related puzzles, games, quizzes, and a downloadable poster. Grades K-2. --Erin Anderson

"Cute, cuddly koalas are often mistaken for bears, but this book dispels that and many other myths about these lovable marsupials. Koalas' ecosystem, life cycle, feeding habits, and social behaviors are all discussed in straightforward detail." --Booklist

I purchased this book along with the Ty Beanie Baby "Eucalyptus the Koala" for my niece for Christmas. She loved both. I found the book to be informative and very educational. It provides basic information about Koalas. You learn everything from their diets, to their habitat. While the older elementary school students may consider this an easy read, the information is invaluable and can be used for science or book reports. Not to mention younger readers can improve their lexile scores.

My son loves this book. It's "real". Great for a young early/emerging reader interested in Koalas. Educational.

Cute educational, love* the pictures

Great book

Used with low level reading ability students in first grade to teach research and text features. Students were excited and engaged!

Great addition to my already growing pile of books.

My granddaughter loves it.
