Customer Reviews

Gary Rubinstein has a BA in mathematics from Tufts University and an MS in computer science from The University of Colorado. He has been a math teacher in Houston, Denver, and is currently teaching in New York. Gary was once voted "Teacher of the Year" and is a three-time recipient of the Math For America Master Teacher Fellowship.

It is a regents review book so there isn't much to say. I purchased this for my son who is taking the NYS Algebra I regents exam this year. He seems to spend more time using the review sites on his laptop rather than what is in this book. I guess that is a sign of the times. I looked over the book and it does have great sections that briefly explain the material covered on the exam. There are also

practice exams and questions as well.

I always love the Let's Review series. Especially with the new introduction of the common core standards, it's always helpful to have a review series that helps you with teaching students. I hate the common core. Hate it.

Nice, concise review but only review. There's not enough instruction here to explain more than the most obvious things. I also found quite a few typos, which at first were easy for me to spot but as the material became more difficult for me it was harder to recognize them.

So easy to use. Didn't even have to leave home to get what I needed. Save me time and gas.

This book helped a lot of my students pass the Algebra 1 Regents!!! I highly recommend this purchase to all of my students in the beginning of the year.

VERY HELPFUL!

This book certainly helps my cousin with algebra. It includes some common core stuff and is even better than the textbooks that the schools supply!

Detailed explanations, with practice questions to check your understanding and answers at the back of the book. I tutor students- this is a great supplement book.
