Foundations Of Landscape Irrigation Design

Synopsis

Quote from The Irrigation Association "This book takes a unique approach to teaching irrigation design. First, it covers just the basic steps needed to do a simple residential or small commercial system, and second, it is written in the same order in which designs are typically done, to assist in the learning process and for later reference. Topics covered are: gathering site information, calculating system capacity, soil-water-plant relationships, pipe sizing, hydraulics, head layout, uniformity, zoning and plan presentation. Written by IA instructors with years of experience in teaching irrigation design. This book complements the many other irrigation design manuals available today. It is unrivaled as a beginning book in landscape irrigation design."

Book Information

Paperback: 166 pages

Publisher: The Irrigation Association (2002)

ASIN: B000HC6U28

Package Dimensions: 11 x 8.5 x 0.5 inches
