The entire book was almost useless to me as I don't play the miniature game and only use the maps for actual star wars role playing. But in each mission book there are a small set of tiles which include various things that are hard to come by in the miniature game. Such as AT-ST walker, Hailfire Droids, The three creatures from Episode 2 in the combat arena, lots of debris and terminals.

Although the books are expensive I can easily copy the tiles now that I have them and keep doing to making the money I spent on the books cheaper than acquiring the mini's

The scenarios, while movie specific, never really seem worth the effort here. But the maps and tiles are always exceptional, and the book is worth it for that alone.

Though I am a huge fan of the Star Wars Minis game, I am not a big fan of the scenarios in this book (some are pretty good, but most are not). However, there are several things I liked about this item that I thought worth sharing. The best thing about this book are the two maps at the end: Map 1: Coruscant -- A very good to great map that is legal for 100 and 150 point tournament play. Works best with shooters, but melee characters also stand a good chance on this map. Map 2: Geonosis Arena-- A very good map that is unfortunately no longer legal for official tournament play (but still a fun choice when playing a casual game with friends). Shooters have a moderate advantage on this map. A couple of other nice things about this item is that there are several terrain tiles of various sizes, as well as Appendix with special rules for how to use some of them at the end of the book. In sum, I would not necessarily buy this book for the missions (which make up 75% of this book), but this item is definitely/still worth getting for the maps, terrain tiles, and the special rules that make up the rest of the book.

the price is cheap and the quality is high. fast and in time. my parents need it, Heavy product with good balance awesome and very well.

Excellent product to a good price that can be acquired for who we collect Star Wars miniature
