Customer Reviews

The guide has information for the games it covers but once I read through it there are areas it doesn't cover. If you want a speed run this will show you the quickest path. If you want in depth this guide skips over many areas.

It has mostly correct information but at times it will tell you wrong things or even leave items and areas out of the guide. A guide book that isnt finished isn't worth buying.

Yes a very good book for the price, well describe, well package, and great arriving time

Condition was well, no tearing of pages or creases to speak of. It came within the estimated delivery date fortunately, and it was what I was hoping for. The one negative, however, was that there seemed to be numerous residue stains on the cover, that must have came from cup rings. It was a

hassle to clean off, and just not very sanitary to have sent in that condition.

This guide is specific and very detailed on the main story but sadly a little vague and unfinished on the bonus content. Still a good guide and I highly recommend.

Great product. No complaints. Would definitely buy from this seller again.

Book was in fine shape and helped a lot.

My son loves this guide. He has many pokemon items so this adds to his collection
