Customer Reviews

This book is another Gail Gibbons classic. If your child loves things like astronomy (or you want to introduce the Moon to them), this book is for you! My son is 3 and it is able to keep his mind active and engaged but could certainly be enjoyed by children up to 7 or 8 years old. This is done by the author in her classic style (the way I love) of giving great information in a FUN, SIMPLE, and EASY to read way! I would say this would be a great book to introduce in a classroom for teachers K-2 teaching on the subject as well. A WONDERFUL Gail Gibbons option, especially when you can get it on for a fraction of the price...I paid \$5 including shipping!!

MY 5 AND 3 YEAR OLDS ARE TELLING ME WHAT PHASE THE MOON IS IN. Correctly, I might add. I bought it to accompany the Moon in my Room toy and we don't have the toy up yet but they have the moon to look at every night so it's been a great educational entertainment for my outdoorsy book loving boys!

"I love the moon. "That is what our great grandson says so he loves the book. He is almost three.

After sharing a MOON / SPACE theme with my class this book truly fulfilled the needs and

questions the preschool children had.

My five year old LOVED learning about the moon from this book. I'm going to order a new one since it fell apart from being taken EVERYWHERE with him.

This is a classic from a classic, wonderful author and illustrator. Gail Gibbons has many books that explain things like pumpkins, apples, and the moon. I recommend any of her books. They can be used with the youngest child, and then with the older child.

Purchased with Uncle Milton - Moon in My Room for my nephew. He loves it. For his 7th birthday.

The book is good,my son love it.
