Miniature Editions are brought to you by the Editors of Running Press.

Details are in the figure. I thought this xenomorph bust was going to be at least 6" tall but nope, it's a tiny bugger, about a little over 2.5" tall, 1.5" wide and 3.5" long. The box immediately reminded me of those miniature toys that you see while waiting in line at a Barnes & Noble to check out, so my immediate expectation was real low. But as soon as I opened the box up, I was delighted to see that the figure is quite detailed! It is modeled after the xenomorph from the first ALIEN movie, with translucent crest that reveals a partial human skull! It's made of a rubber material with a hard translucent plastic that makes up the crest. It's pretty sweet if I must say so myself. The horn on the back of the bust can be pressed down, which pushes out the xenomorph's inner jaw and triggers a cool screeching sound effect. The "illustrated" book, also based on the first ALIEN movie, is a collection of screenshot from the movie with memorable quotes. More like a photo book. Cool item to have and makes an excellent desk buddy at work :).

For a miniature version is a nice little hissing baby statue. The book, unreadable. It's printed on the cheapest paper and I some where still stuck so it's impossible to read after the first page that reads "in space no one can hear you scream" the book is at most 2 inches tall and the hissing big chap isn't accurate in the back where it's supposed to have multiple tubes extending out of its back but instead it has one big spike that you push down like a lever in order to make the sound. I paid \$10 for it but if you ask me it's a rip off. The only reason I'm keeping it is because it's my sons birthday and he asked if he could keep it so I couldn't say no. At a better price and a better printing of the book would've gotten probably the best bang for my bucks but today was not the day and I'm kind of disappointed. The saying you get what you pay for isn't always accurate. I paid more than the items worth.

I am not sure why other reviewers were surprised by the size. The box dimensions are clearly stated in description. I am a big fan of most of Running Press's miniature kits and I am more than pleased with this Alien bust and book. I am especially happy that the batteries can be replaced (unlike the Planet of the Apes set). The Bust is nicely detailed & hisses louder than I expected. It was a great feature to have the inner jaw extend as part of sound. Fun book with nice pics & quotes. I ended up buying three of these. Hopefully an Alien Queen is in production.

love it but not going to lie smaller than exspected but figure higher quality than exspected for the price love it book just cute a few quotes but not much of a book

Pretty awesome details. The Sounds should scare the cat..

I knew this didn't cost much when I pre-ordered, but I should've taken closer note of the dimensions, this is small! Especially the 'book'...

I was expecting a bigger item. This thing is so tiny. Like it fits in the palm of your hand. It's cool but way way to small.
